ABILITIES

Web development
Responsive Desing
Clean code
Git
Empathy
Team work

ABOUT ME

I'm Self taught, Developing in Javascript and React.
I like the clean design and minimalist; my objective is expand my knowledge and gain experience.

EXPERIENCE

Luxury Cars - a vehicle sales business web • 2021
Built in React and Styled Components with dependencies like react-router-dom.
The project have four pages (home, about, erro404 and the single view for each car) and is **responsive design**.
I implemented a slider for the images without libraries and a option to choose the color for the car with custom radio buttons.

front end portafolio • 2021
My portafolio built in react and Sass (for the styles).
I implemented the library react-hook-form for the contact formulary and Email.js for send the image of the form to my email,
I built a modal with react Portal for displaying each project with the image and descriptions.,
Lastly, for the hosting i use firebase.
The site is **responsive design**

25Alfajores - Single page grocery store • 2020
This is a single web aplication created for a grocery store,
Built in HTML CSS and JS and responsive design.
I used dependencies like SimpleParallax.js for the parallax effect in the header
And Glider.js for the image slider.

EDUCATION

Udemy
2020 | Diseño Web Profesional El Curso Completo, Práctico y desde 0
2021 | Aprende React + Firebase | 2021 Actualizado
