

MARTIN MEZA

FRONTEND DEVELOPER

EXPERIENCE

NO COUNTRY

Dec2021 - Jan2022

With my team, we had planned and designed about the project.

As a **frontend** developer, I had to translate the design to code in **REACT** and **CSS**, fix minor errors and make the project responsive design for mobile versions.

Lastly I had to deploy the project.

LUXURY CARS - VEHICLE ECOMMERCE

August 2021 - October 2021

Built in **REACT** and **Styled Components** with dependencies like **react-router-dom**.

The project has four pages (home, about, error404 and the single view for each car) and is responsive design.

Lastly I implemented a image carousel and the option to choose the color for the car.

PORTAFOLIO

Jun2021 - August2021

My portfolio built in **REACT** and the preprocessor **SASS**. Also I implemented the library **react-hook-form** for the contact formulary and Email.js for send the message to my email.

With React Portal function I built a modal for displaying the information of each project.

Lastly, I deployed the project in firebase.

ABOUT ME

I'm an Argentinian Frontend Developer in Javascript and React. Also a Self taught passionate with more than 5 projects in the web.

EDUCATION

UDEMY

Certificate of completion Diseño Web Profesional El Curso Completo. Práctico y desde 0

ABILITIES

Web development
